Not For Sale

Please share this. It would be lovely if you keep this intact as you share it with your friends, family and networks.

Share This Today

3 Word Wisdoms is a collection of 3 word lessons, statements, ideas that can inspire you, motivate you or remind you to take action (or even stop some action).

This resource is not about converting you to any specific way of thinking, being or doing. It's about allowing you to get a little wisdom in those moments when you may need that little bit of external help.

As you read a wisdom let the words be whatever they may be for you. In some cases, say the sentence three times putting emphasis on a different word each time, from doing that you'll get three different meanings e.g.

Speak Your Truth – speak up and share it with others

Speak **Your** Truth – speak about your own truth rather than others, people want to hear about you

Speak Your **Truth** – speak only your truth, share wants really going on, lift the protective mask and show the real you.

As you flick or scroll to a random page and read the 3 words, it might at first seem silly, obvious or unrelated. But as you go about your day you'll be surprised how those 3 little words will have some relevance

in some way.

Use the three words could be the start of a deeper conversation.

Credit where credit is due. Some of these wisdom's you've known for years, conventional sayings you seem to have been born already knowing. Some wisdoms are from our society's thought leaders, while others your parents barked at you while you were growing up, and others have come from more spiritual sources.

These **3 Word Wisdoms** are not owned by the people who've brought this book into being, they are shared from each individual's own experience. No plagiarism or false declaration is intended, merely collating and curating a collected learning and knowledge.

This resource does not replace, reduce or diminish any other 3-word wisdoms that are available elsewhere. It is intended as a contribution toward the collective wisdom. If you do a Google search of '3 word wisdoms' you'll find a few other links that also share this inspiring idea.

Collaboration is a critical ingredient of the success of **3 Word Wisdoms**. I am a smart girl however I'm not as smart as when I

collaborate with a lot of smart people. Your **3 Word Wisdoms** are brought to you by:
